Soft Skill

Backend:

J2EE, Spring Boot, C#, .NET ,C ,DS, Node js, C++.

Frontend:

React, JS,Html5,Css3

Database:

Mysql

Academic Project

Leaf spring shackle is used in leaf spring suspension systems in heavy vehicles. Free-hanging part called leaf spring shackle lets the leaf springs stretch and adjust when the car moves. So if there is no shackle, the spring will become stiff and its operation as a suspension system will get obstructed. Leaf spring shackle as a part of suspension system helps to enhance the leaf spring flexibility.

Graduation Project

The project aims to develop an online platform for users to maintain goals and progress, assist users in creating workout plans according to their goals and provide nutritional advice and diet plans. Provide workout images and video according to their plans and users can also select personal trainers.

Technology Used: J2EE, MYSQL, REACT, SPRING BOOT

Career Objective

To achieve high career growth through a continuous learning process, keep myself dynamic, visionary and competitive with the changing scenario of the world and to contribute to the growth of the organization.

Education Background

Institute Of Emerging Technologies

Diploma In Advanced Computing(CDAC)

Completed in 2023

60%

Smt. Kashibai Navale College of Engineering

Bachelor of Engineering

Completed in 2022

75%

S.S.M.M college

12TH

Completed in 2017

71%

S.G.S Highschool

10TH

Completed in 2015

90%

Language

English, Hindi, Marathi

Technology & Tools

Git, Vs-code, Eclipse STS understanding of Docker, Jenkins AWS-EC2 Instance.

Interests

Workout, Travelling
